# PATHOLOGY TESTING

## Podiatry Services

### Our History

Histology Associates is acutely focused on delivering evidence-based, accurate, and highly accredited Pathology services. We are a national, full-service Anatomic Pathology Laboratory, licensed in all 50 states. Our commitment to excellence is backed by 30 years of experience providing gross and microscopic examination on surgical specimens. We are accredited by the College of American Pathologists, licensed by the Clinical Laboratory Improvement Act, and are a proud Corporate Partner of the APMA and the AAWP.

Our lab was founded in 1982 by a Pathologist who was responsible for developing Residency programs in local Hospitals and supporting their needs. From the very beginning, we have always employed highly qualified laboratory personnel with the expertise to handle a wide variety of specimens and complex procedures.

Our mission is to provide our Physicians with a timely and clear diagnosis, holding ourselves to the highest quality of laboratory standards while maintaining professional, friendly relationships with our Physicians, their staff, and their patients.

### Our Services

- **Insurance Billing** – We participate with all third party insurers and bill payers directly for our services, relieving you and your patients of billing difficulties. Histology was chosen by Blue Cross Blue Shield to be a PPO (Plus) participant and also participates with many other insurances including Medicare, United Health Care, PHP, PPOM, PHCS, 1st Health, PHS Networks and many more. We give personal attention and explanation to any patient who may require it.
- **Personal Attention** – You will have access to our technical staff, client services, and billing department toll-free at: **800-444-PLab**.
- **Shipping** – We supply all the necessary materials for the shipment of specimens, including individual mailing containers and padded envelopes. We also pay all postage and shipping fees.
- **Special Stains** – We use special stains such as PAS, ABPAS, Giemsa, and HP to demonstrate organisms and other structures.
- **Report** – A comprehensive Pathology report on any type of anatomic surgical specimen is issued by a board certified Pathologist. Reports can be mailed, faxed, or placed in an LIS portal. A verbal, preliminary report is available upon request within 24 hours. Any abnormal findings will immediately be reported by telephone to the attending Physician. A color photograph of the microscopic specimen can be provided upon request as well at no additional cost.
- **Professional Consultation** – Our board certified Pathologists and technical specialists are readily available by telephone.
